

Sample Document

Programming and Concurrency - Lab 1

This is a test document for the HTTP file server implementation.

Introduction

This document demonstrates the ability of our custom HTTP server to serve PDF files over TCP sockets. The server handles GET requests, parses HTTP headers, and responds with the appropriate content type.

Technical Details

- Protocol: HTTP/1.1
- Transport: TCP Sockets
- Programming Language: Python 3
- Port: 8000
- Supported file types: HTML, PDF, PNG
